[PRINTABLE VERSION](#)

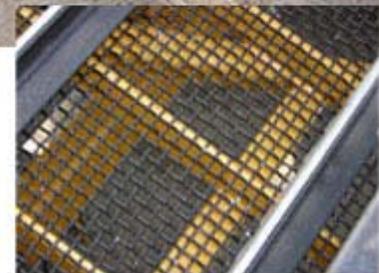

The 4700XL Beach Cleaner has an overall cleaning width of over seven feet, and impressively power screens a clean **6 1/2' wide deep screening pass**, with adjustable depth settings to **6" deep**.

The single-screen beach cleaning / screening system **(1)** greatly reduces maintenance and improves life over revolving tines or revolving mesh screen methods. The screen life and effectiveness is further enhanced by positioning the conveyor flights just above, but off the screen.

Keeping the flights off the screen is achieved by the use of puck glides **(2)**. This innovative design makes for the fastest, most productive Beachcleaner in the world. Debris is collected in a 2.2 cu. yd. hopper with a 9 1/2' dump height.
