

Customize and protect workstations.

Low-profile Gator® Accumulation Centers are the economical solution to spill concerns during drum filling and dispensing operations. They are ideal for chemical or battery storage needs. "Gator-Tuff" seamless construction in 100% polyethylene eliminates leaks and is nearly impervious to chemicals including acids and corrosives. Sturdy, self-locating grates eliminate the chance of ride-up and remove for easy cleaning.

Companion Ramp facilitates loading and unloading of heavy drums and features anti-skid ribs for maximum safety. It can be conveniently located anywhere, on any size center sized 2-drum or larger. Combine 2-, 4-, 6-, and 8-drum modular units to create your own customized system. As capacity needs increase, use optional **Joining Clips** to firmly lock units together and expand your storage space. Sumps remain separate and clips can be removed for easy repositioning. In applications calling for a continuous sump, optional **Sump-to-Sump™ Drain Kit** (including joining clips and transfer tube) allows you to join centers together, on-site, for full compliance with EPA and Fire Codes when combined sump capacities meet 66 gallons (250L).

Strong and robust!
Rotocast molded for a more robust structure versus other "blow molded" units.

Build your own customized system!

By joining centers together with the patented Sump-to-Sump™ Drain Kit for a total 66-gallon sump capacity, you will meet EPA and UFC requirements.
