# hydration STATION™

- Great Tasting “Polished” Water
- Water-On-The-Go Convenience
- From a “Touch-Free” Hygienic Appliance

Better Than Bottled... It's “Polished!”

## Convenient, Great Tasting.

Hydration Station™ offers a convenient, touch-free hygienic alternative to bottled water and other less-healthy soft drinks. Not only is it a better answer for today's health-conscious lifestyles, but it is environmentally friendly as well. With almost 50 billion half liter bottles of water consumed each year in the US alone, the empty bottle blight is becoming a serious problem in many areas.

Hydration Station™ supplies pure, fresh water, that is "polished" one final time as it's dispensed, using state-of-the-art on-site filtration. And, its touch-free hygienic design enhances the sanitary condition of the appliance at all times. Also, antimicrobial additives to key plastic components protect those surfaces from build-up of mold and mildew.

Hydration Station™ is available with or without a remote chiller, which can be ordered separately. Get more information on Hydration Station™ and tips on staying hydrated at [www.stayhydrated.net](http://www.stayhydrated.net).

## FOR THE SPECIFIER: As Green As Green Can Be!

- Hydration Station™ delivers superior quality, point-of-use drinking water.
- Hydration Station™ can be used in any application where local plumbing codes call for a commercial drinking fountain.
- No water storage issues to deal with or plan for.
- May qualify for LEED points; check for status updates at [www.stayhydrated.net](http://www.stayhydrated.net).
- Every refill of an existing small water bottle saves approximately ¼ of that bottle full of crude oil (the oil used in manufacturing, shipping, etc.).
- When properly installed, this product meets ADA wheelchair accessibility guidelines for either child or adult use.
- UL Listed; IAPMO Certified.

## Features and Benefits

- Sensor operated for touch-free hygienic operation.
- Available with or without remote chilling option.
- Fast fill-ups with drip-less dispenser.
- Durable ABS plastic front panel with hidden lock and hinges.
- Servicing: Simple front access for easy ¼ turn spin-on filter replacement without shutting off water supply; long-lasting filter cartridge; LED read-out for monitoring filter life status.
- Key components antimicrobially protected\*.

## Model and Option Availability

- |                                     | <i>Part #</i> |
|-------------------------------------|---------------|
| • Hydration Station:                | 2000          |
| • Optional 8 gallon/hour chiller**: | HCR8          |

\* *Protects against the growth of mold and mildew*

\*\* *If higher capacity/volume of chilled water is desired please contact Haws Customer Service 888-640-4297.*

## FOR THE FACILITY OWNER: Added Value, Lower Cost and Lower Risk!

- Provides superior quality water, with enhanced convenience; shows concern for the well-being of employees and others.
- No storage and purchasing problems associated with buying and storing small bottle case packs or 5 gallon bottles of water.
- No restocking of shelf or refrigerator issues to deal with; no refuse issues associated with bottled water; avoids “Ban the Bottles” issues.
- Lower risk, both in not having unknown persons delivering 5 gallon bottles into your facility and in not having staff members changing out potentially dangerous 5 gallon water bottles.
