

Lyon Engineered Storage Systems

As the nation's leading producer of work-related storage products, Lyon is also highly proficient in the development of custom designed, professionally engineered storage systems.

Established in 1901, Lyon expertise and experience cover the full spectrum of storage and movement requirements—from small parts to large palletized loads, and everything in between.

Typical installations include:

- Distribution Centers
- Warehouses
- Maintenance Facilities
- Record Storage, Archives
- Large Service Operations
- Expanding Parts Departments

Below: Selective pallet rack multiplies storage space for archives in a huge warehouse located near Chicago, Illinois.
