

Patented Carbon Insert

Carbon insert creates a grounding path between the cover assembly and the flame arrester in the spout. Space-saving, **Type I Oval Polyethylene Safety Cans** increase shelf storage capacity by 30%! Trigger mechanism enables the pouring of small quantities of liquid. Leaktight, self-closing cap prevents spillage and automatically vents to guard against explosion. Dual-density flame arrester protects against external heat sources. Justrite's unique design includes a patented, current-carrying, carbon insert imbedded into the can for proper grounding.

Oval Nonmetallic Type I Cans for Flammables *New Items*
