Eighty-three pre-engineered modular drawer cabinets are now available to satisfy almost any requirement for high density storage and retrieval of parts, tools, supplies, instruments and equipment in commercial, industrial and institutional facilities.

Removable Base Closure Panels
 Wider Base Opening for Forklift Access

Designed and built to deliver payloads of 400 lbs.* per drawer, each Platinum 250/251 Series cabinet is engineered to provide years of reliable performance—backed by the Lyon Limited 5-Year Warranty.

Six basic cabinet heights and fifteen different drawer heights accommodate endless varieties of products as small as marbles or as ponderous as

bowling balls, while six standard colors offer the potential for as many as thirty-six combinations of colors for cabinets and drawers.

Drawer Layout Kits and Accessories, Extra-Wide and Double-Wide cabinets, Modular Drawer Workstations, Modular Drawer Shelving, Shelf Cabinets and Drawer/Door Cabinets complement the six basic Platinum Series cabinet selections to provide added versatility and maximize utilization of modular drawer installations within your facilities.

Pre-engineered selections of Platinum Series modular drawer cabinets include six of the most popular cabinets with partition and divider kits installed—in stock for immediate shipment!

Single Drawer Access 250 Cabinet Series

Our Safetylink system is included on all Lyon modular drawer cabinets carrying the 250 series prefix in the catalog number. Safetylink automatically locks unopened drawers in place when one drawer is pulled out – preventing accidental tipping and potential for injury. 250 Series cabinets also include standard lock that secures entire cabinet.

250 SERIES

251 SERIES

Multiple Drawer Access 251 Cabinet Series

Customers who want access to multiple drawers in the same cabinet simultaneously should order catalog numbers with the 251 Series designation. See page 61 under Locking Systems. Cabinets include standard lock and anchoring kit.

Important: We strongly recommend cabinets without Safetylink be properly anchored to prevent tipping.

*with 2 partitions per drawer
