Eye OR Eye/Face Washes

BY HAWS

MODEL 7501

Model 7501 portable gravity operated eyewash features a 9 gallon capacity, FDA high-density green polyethylene tank that provides for a full 15 minutes of full pattern flushing at .4 GPM. Bacteriostatic additive permits water storage for up to six months.

MODEL 7260B/7270B

Wall mounted unit features medically acclaimed AXION MSR™ eyewash and eye/face wash head assembly. This revolutionary inverted flow design is the only product on the market that provides a response consistent with medical protocols by sweeping contaminants away from vulnerable nasal cavity. This unit features a round 11" green ABS plastic receptor and aluminum wall bracket for long life.

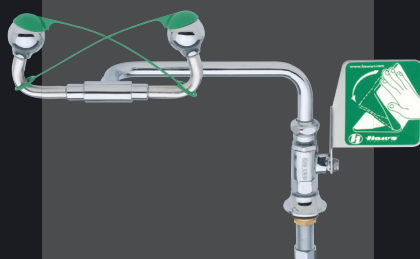

MODEL 7360B/7460B

Wall mounted unit features medically acclaimed AXION MSR™ eyewash and eye/face wash head assembly. This revolutionary inverted flow design is the only product on the market that provides a response consistent with medical protocols by sweeping contaminants away from vulnerable nasal cavity. This unit features a round 11" stainless steel receptor and aluminum wall bracket for long life.

MODEL 7610

Model 7610 is installed in accessible sink locations for quick locating and convenient operation. Twin Feather-Flo® heads are easily activated by the emergency equipment's fold-down design. Once activated the Feather-Flo heads are able to provide a quality coverage area for the eyes and face with their soft flowing streams of water.

MODEL 7612

Model 7612 is installed in accessible sink locations for quick locating and convenient operation. Twin Soft-Flo™ heads are easily activated by the emergency equipment's stainless steel push flag. Once activated the twin Soft-Flo heads are able to provide an ideal coverage area for the irrigation process. When not in use, the 7612 utilizes a swing-away feature so the area stays clear for everyday use.
