

HazMat Response Cabinets

Organize and store your spill containment/HazMat response equipment on the shop floor, close to the areas at greatest risk. Safety experts agree that rapid response to a HazMat emergency can greatly reduce risk exposure and collateral damage.

Features include:

- Shelves adjustable on 2" centers
- Double doors swing full 180° for maximum access
- Three point locking device
- Shipped fully assembled, ready to use
- Safety yellow finish

5460HM – 36" w x 24" d x 78" h cabinet with 4 adjustable shelves

5461HM – 36" w x 24" d x 78" h cabinet with center partition, coat rod, full width shelf and 4 half shelves (permits storage of HazMat response apparel on hangers)

Accessories for Safety Storage Cabinets

Oily Waste Cans

- Prevent fires sparked by spontaneous combustion of cloths or swabs saturated with flammable solvents, paints or oils.
- Square shape fits efficiently along walls, beside posts or out in the open – for convenient access.
- Foot treadles or hand-lifts allow covers to open 60° and close automatically when released.
- Air holes in raised bottom of each can provide ventilation to disperse heat buildup.
- Red baked-on enamel finishes resist corrosion.

2-Gallon

Bench Cans

- Perforated dasher speeds small parts cleaning – submerging parts in cleaning solvent then springing back to allow fluid to drain into can.
- Dasher design reduces fire hazard.
- Hinged cover helps cut evaporation.
- Corrosion resistant finish.
