Corner Entry Series SP1900

**ProLine® Custom Doors**  
Available as by-pass, pivot and neo-angle configurations

# Choosing a Bath or Shower Door Is Easy!

Finding the perfect bath or shower door is easy when you follow our five simple steps.

① Select either a bath or shower door.

**Bath Door**  
For a bath or bath/shower combination.

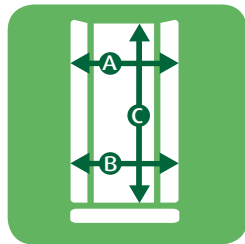

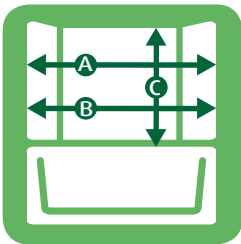

**Shower Door**  
For a unit designed exclusively for showering.

② Determine your door size.

## Step-by-Step Measurement Instructions

It is critical that you know how to correctly measure your door.

- Measure distance from wall to wall at both top and bottom of opening (A & B).
- Select door with maximum opening size equal to, or slightly greater than, your largest measurement.
- Measure distance from top of the bath ledge or shower base to top of the wall unit or tile wall where you want the door to be located (C).
- Select a door with desired height equal to, or slightly less than, your measurement.

**IMPORTANT:** When measuring the height, do not measure to the top of the bath/shower, shower unit or tile if there is a beveled or radius top edge. Keep the height measurement below that edge.

③ Choose a door type and frame option.

### By-Pass

Two overlapping glass panels that slide back and forth along a bottom track. Commonly installed on 60" baths and 48" and 60" showers.

### Pivot

This door is designed to fit shower openings 24" to 48" in width and swing out from the wall like a traditional door, even when walls are not parallel. Pivot doors provide the greatest range of adjustability.

### Hinge

This shower door swings open, has a full-length metal hinge on the side of the door and is adjustable for out-of-plumb conditions. Hinge doors are typically used with shower openings of 27" to 36" in width.

### Neo-Angle/Corner

This door consists of a center door with an angled fixed panel on either side of the door, making it ideal for space-saving installations.

### Framed

Aluminum frame mounted to the edges of the glass door panel adds structure to the glass.

### Frameless

Minimal metal framing creates a sophisticated look and feel. Thicker glass is used to eliminate the need for structural framing.

④ Select a frame finish that complements your décor.

Silver

Matte Silver

Polished Brass

Nickel

White

Deep Bronze

Not every style is offered in all finishes.  
The frame finishes shown above are crafted from anodized aluminum.

⑤ Select a glass texture or pattern that completes your space.

STERLING® doors are available in a various thicknesses with an array of alluring textures and patterns. Not every style is offered in all glass options.
