

# Cleaning Tanks FOR HAZARDOUS LIQUIDS

Utility Products

*Portable, safe solution to parts cleaning.*

**Dip Tanks** are useful for cleaning parts and sub-assemblies where the volume of work does not warrant use of a larger rinse tank. They are easily moved to accommodate changing production requirements. Dip tanks have manually operated covers which stay open for convenient access. Covers are equipped with a self-closing mechanism and fusible link which melts at 165°F (74°C) to automatically close the cover in case of fire. Constructed of 24-gauge, lead-free coated steel and finished in a durable powder paint for long use.

**Wash Tanks** are designed to simplify small parts cleaning. An integral parts basket facilitates washing quantities of small parts quickly. Both the can and basket are made of sturdy 24-gauge, lead-free coated steel. After cleaning, the basket is positioned at the top of the tank to allow solvent to drain. Cover is equipped with a self-closing mechanism and fusible link which melts at 165°F (74°C) to close the cover in case of fire.

**Dip and Wash Tanks with polyethylene liner** offer outstanding chemical resistance to permit use with the harsh, corrosive chemicals sometimes used in labs and industrial environments. Liners are easy to clean or replace when necessary.

**Handy Tank Stand** is made of 18-gauge, lead-free coated steel with a powder coat paint finish for durability. Suitable for all Justrite cleaning tanks, it allows storage of solvent container at point-of-use when using Type I or Type II containers (not included).
