

# Ultra Modular IBC Spill Pallets®

## Meet EPA Regulations With Low-Cost Outdoor Spill Containment For Multiple IBC Tanks

- Models available for 2, 3, 4 or 5 tanks.
- Each IBC tank sits on a low-profile spill pallet with a containment capacity of 75 gallons — Expansion Tanks provide 65 gallons of additional capacity.
- 100% polyethylene construction — eliminates the potential for rust and corrosion.
- “Flow-through” bulkhead fittings connect spill pallets and Expansion Tanks together, allowing spills to be channeled throughout the containment system — containment capacity is thereby “borrowed” from adjacent spill pallets and Expansion Tanks.
- Unique “roll top” enclosures and swing-out doors allow convenient loading and unloading of IBC tanks.
- Compartments are lockable for secure storage of hazardous materials.
- Optional Extender Kits (Part# 9658) provide for the addition of another compartment. (1 tank per Extender Kit).
- **Meets SPCC and EPA Container Storage Regulation 40 CFR 264.175.**
- **Helps meet Stormwater Management Regulations — NPDES, 40 CFR 122.26 (1999).**

3-Tank Model: 355 Gallon Capacity (Part# 1166)
