

## GO! Chassis® Lighthouse™ Mobile Lighting

The GO! Chassi® Lighthouse™ line brings up to 100,000 lumens where needed, quickly and safely. Featuring high intensity lighting and onboard power, the GO! Chassi® Lighthouse™ is the solution for first responders and other dusk to dawn service providers in various commercial and municipal markets. Designed for demanding Homeland Security applications, the GO! Chassi® Lighthouse™ services environments where application readiness and rapid deployment are mandatory. The versatile line is designed for single person operation and can direct light while being carried by a vehicle or lowered and rolled to a scene. By using the quick detach feature, either Light Tower can be removed and safely deployed using built-in tri-pods. Storage of the GO! Chassi® Lighthouse™ is simple and direct, freeing up tight quarters for other mission-critical pieces of equipment. *GO! Chassi® Mbox® and GO! Chassis® Just Hitch & GO! can be purchased separately. Visit [edarley.com/gochassi](http://edarley.com/gochassi) for complete specifications and details.*

BC120	Super Command Cabinets	44"Wx22"Hx26"D	\$1,695.95
BC121	Super Command Cabinets	47"Wx22"Hx26"D	\$1,695.95

## Custom Apparatus Covers

D&S Custom Covers produce high-quality, protective products for fire trucks. Speed is of the most importance and all of our covers are manufactured to give firemen the quickest access possible and still protect. The materials that we use is the highest quality available. Our covers are produced to meet or exceed N.F.P.A. Standards. The standard tarping material is 22 oz. per yard, and meets stringent industry standards. This material comes in eight colors. (Black, Red, Blue, Green, Yellow, White, Orange, and Gray). 40 oz. material is also offered (black only) which is used in special applications only. Covers are fastened using our patented fastening system which uses Teflon "J" hooks and a special produced shock cord which goes through the hem of our tarps. The Teflon hooks are fastened to the fire truck by stainless steel machine screws. By using this system, the tarp will always fit weather changes. Overloading your hose bed and even walking on the hose bed, the cover will stay tight and not tear. *Contact your Darley representative for pricing and options.*

### Features:

- ▶ Crosslay and speedlay protectors
- ▶ Compartment protectors
- ▶ Tray protectors
- ▶ Simple installation
