POLY–RISER™
FLOORING

GRID TOP

RIB BOTTOM

Modular plastic panels line up horizontally to fit any floor! Surround large machinery to provide a flow-through floor that keeps workers up and out of the way of harmful solvents, oils, and water. When it's time to clean up, simply lift out any of the individual panels in the system.

Choose from one of our two standard sizes or contact our professional flooring consultants for custom sizing options to create a perfect fit, no matter what the environment. No-tool assembly means that you can easily modify your space assuring that your new floor will provide years of reliable service!
