

Portable Collapsible Fol-Da-Tank

The First and Still the Best

It was more than 50 years ago that the first Fol-Da-Tank was introduced to firefighters, who recognized its value and quality immediately. Fol-Da-Tank Co. has been continually improving frame and fabric designs to help provide the most reliable portable water tank in the industry. Fol-Da-Tank has proved to be the practical answer as an extra water supply for rural areas, where water pressure is low or as a back-up facility for municipal fire departments. It's available in nine standard sizes. Fol-Da-Tank doubles the fire fighting ability of a tanker truck at an affordable price. Two firefighters can unload from the truck and set up in 30 seconds. While pumper empties the Fol-Da-Tank, a tanker can be supplying more water. With the fire out, Fol-Da-Tank can be emptied quickly with the exclusive 10" diameter drain sleeve. You can store the drain sleeve inside or outside of the tank.

Construction Features

- ▶ **Liners** - Hypalon, FDA
- ▶ **Frames** - Steel, resistance welded 14-gauge 7/8" round steel tubing with snag-free finish
- ▶ **Hinges** - Die-cut
- ▶ **Grommets** - Solid brass
- ▶ **Bolts** - Heavy-duty

Specify Color: *Hypalon - Red or Yellow*

Easy 1-person setup

Self-Supporting Frameless Portable Water Tank

These self-supporting frameless water tanks have been designed to meet the most stringent requirements of rural/ urban fire fighting. Problems with inadequate or unusable supplies of water are eliminated by the use of open top self-supporting portable water tanks. In remote areas, the self-supporting tanks are designed for standby water containment, water shuttling situations and to provide a continuous portable water supply. In remote areas, the SST may be filled by pumping water from a natural water source, such as a stream or creek, with a small gas-operated pump. As the self-supporting tank begins to fill with water, its unique

design allows it to become self supporting automatically. The SST can be used as a mixing tank as well as a temporary holding in hazardous waste situations. It may be quickly drained through a threaded flange fitting on the side. The tank is totally collapsible and easily stored in its own compact storage bag. It can be stored in the side or back of a truck, or the cargo compartment of a helicopter. Made of heavy-duty industrial PVC.

- ▶ No frame
- ▶ No need to inflate
- ▶ No foot pump
- ▶ No auxiliary air
- ▶ No assembly
- ▶ Mixing tank
- ▶ Hazardous waste
- ▶ Fire fighting
- ▶ Water relay
- ▶ Water storage

Specify *NST* or *IPT*, male or female threaded flange coupling, installed. Specify size choice of threaded drain flange coupling, 1 1/2"-5" available. 6" additional cost.

Specify color: *yellow, red or orange.*

Cat#	Gal.	Size Open	Ship.wt.	Price
