

# ASSOCIATED Welding Accessories

Model 5000 Speedy-Loop provides easy on/off welding helmet mounting on protective caps. Fully adjustable to better fit Fibre-Metal caps and major competitive brands. Model 4000 Quick-Lok provides more permanent mounting for longer term or high activity applications. Model 6000 Quick-Lok mounting blades for quick and easy mounting of Fibre-Metal welding helmets on protective caps with mounting slots.

## WELDING HELMET PROTECTIVE CAP COMPONENTS

MODEL 4000 Quick-Lok

MODEL 6000 Quick-Lok Mounting Blades

MODEL 5000 Speedy-Loop

Blades pivot for easy measuring of eleven most specific fillet dimensions. Measures concave or convex seams. Stainless steel blades, etched increments. 1/8" thru 1" and metric equivalents. Fits in 4 1/2" x 2" case. Carry in pocket

## WELD FILLET GAGE

MODEL WFG

Universal design coupled with high performance insulator material and reliable brass, cam-locking connectors result in a solid electrical contact, the ability to withstand weathering and a snug fit to seal out dirt and to protect against electrical shock.

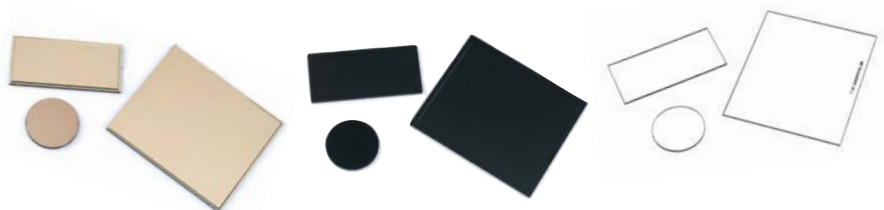

## CABLE CONNECTORS

MODEL FM4HD

Full line of filter, safety and cover plates plus magnifiers. Includes top quality glass or plastic plates and lenses for virtually every metal fabrication application. (For additional details request our High Performance filter plate brochure)

## HIGH PERFORMANCE FILTER, SAFETY, COVER PLATES AND LENSES

Omni-View® Gold coated filters

Choice of glass or polycarbonate filters.

Polycarbonate safety plates, CR.39 cover plates.
