

GLOW IN THE DARK PRODUCTS

All our glow-in-the-dark signs are manufactured using high quality GLOW BRITE® self-adhesive material. GLOW BRITE® is a non-toxic, non-radioactive glow-in-the-dark polyester material that stays illuminated for over 10 hours following just 30 minutes of exposure to natural or artificial light. Material will glow the brightest during the first 30 minutes; after activation has ceased it will remain visible in darkness to the adapted eye for over 10 hours. Available as self-adhesive polyester material (V) or plastic with self-adhesive laminate (P).

3-DIMENSIONAL SIGNS

3-D Glow Signs provide maximum visibility for locating your fire and safety equipment in complete darkness conditions or in very low light. Tall signs below have a 4" x 18" face. Compact signs to the right have a 7" x 10" face. Signs are .060 plastic with GLOW BRITE® self-adhesive laminate.

GLFA3D-710
7" x 10" face

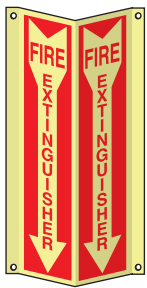

GLES3D-710
7" x 10" face

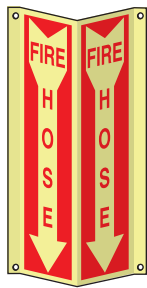

GLEW3D-710
7" x 10" face
