

## Super Auto Eject & Auto Eject

Super Auto Eject is a completely sealed automatic power line disconnect. This prevents contamination of the mechanism by road dirt and insures long, reliable life. Comes with a weatherproof cover that is spring loaded to close, preventing water from entering. A solenoid wired to the vehicle's starter is energized when the engine is started. This instantaneously drives the plug from the receptacle. This simple, reliable device eliminates the broken cables which result when drivers forget to remove the shore line when driving away. The Auto Eject comes without sealed housing. *All units come with 120v AC connector.*

*Ship. wt. 2 lbs.*

**Auto Eject**

*Comes without rear housing*

**Super Auto Eject**

*Comes with rear housing*

**Specify color: red, white, yellow or gray**

| <b>BH083</b> | 15 meter 4-pin Camera Cable | \$19.95  |

## ICA900 Intercom System

**Bring Clear Communication to New Heights**

The ACT (Always Clear Talking) intercom system from FRC has updated noise cancellation circuitry that essentially eliminates acoustical background noise. The compact control module is separate from the speaker box to provide installation flexibility. Multiple mounting options, needing only a two-wire connection between stations, and hands-free remote operation make this intercom especially useful for aerial applications.
