

Vector™ Lightbar

The Vector™ Shape Provides You With All-Side Warning

The ultra-modular Vector™ light system features a patented V-shape for superior warning effectiveness at crucial 45° and 90° angles. This shape directs more warning light to the front, sides and rear for added protection at intersections. The Vector™ light system consists of seven modular pods which are shaped to significantly improve light transmission and reduce dome angles that reflect light on conventional lightbars. The unique, modular design is flexible enough to enable you to design a light system to meet your specific needs. *Ship. wt. 60 lbs.*

48" Vector™

2-year warranty

Basic Vector™ Comes with (2) 95 FPM and (2) 175 FPM rotators, (1) oscillating light, (2) rear flashing lights, (1) takedown light, (1) California steady burn light & alley lights.

Specify each pod dome color & vehicle mount

Great for professional vehicles

3-Pod Mini-Lightbar

Get the Performance & Aerodynamic Styling of the Popular Vector™ Lightbar

Get crucial side warning power at intersections with the latest style in mini-lightbar warning. Each pod uses a 55-watt halogen bulb and a rotator with the center pod rotating at 175 FPM and the 2 outer pods each rotate at 95 FPM for a combined total of 365 brilliant flashes per minute. Includes permanent mounting hardware and 12V direct-wire hookup. Available with your choice of each individual pod color. For greater versatility, get the magnetic mount with car lighter plug. *Includes 90 lb. magnet, two aluminum mounting legs and 12V DC cord. Ship. wt. 14 lbs.*
