

# Stacking Boxes - Reverse Taper

These rotationally molded stacking boxes are designed with a reverse taper - the bottom is slightly larger than the top. This allows the boxes to stack securely without sliding or falling inside one-another. It also helps to transfer weight around the entire rim, allowing for far greater load capacity. Stock color is gray for most models - colors available for minimum quantities at no extra cost. Custom sizes also available - call for details!

The TF-14 is designed to stack with standard size "milk crate" type containers.

Model Number	O.D. Top LxW	I.D. Top LxW	I.D. Bottom LxW	Depth	Shipping Weight
HT-3	11.5" x 10"	9.75" x 8.25"	9.5" x 8.5"	3.75"	.5 lb.
