Darley Flexible Hard Suction Hose

Makes pumper-to-hydrant or pumper-to-tanker hookups easier and faster because the hose is more flexible. Also known as corrugated hard suction hose, Darley's Flexible Hard Suction Hose allows you some leeway when lining up your pumper for hydrant connections. Because it's so flexible, you can bend the hose to make your connection even if it's not properly lined up or too close. Features smooth bore and is tested to 25" of vacuum. Rubber and polyester construction reinforced with a round steel wire. Hose comes with anodized lightweight rocker lug male x long handle female coupling. NST threads are standard.
