

CMC Rescue Harness

This classic CMC harness design offers outstanding comfort in a very lightweight design. The CMC Rescue Harness was the first harness we know of designed to meet the needs of rescuers rather than sport climbers. Its unique front D-Ring provided an attachment point that will accept multiple carabiners and made clipping quick and secure even when hanging in the harness. The front lift assembly has been re-designed for greater comfort which includes improved adjuster buckles and Web-Keepers. Light padding has also been added on the waist to increase comfort without adding unnecessary weight or bulk. The leg loops are now the same, low-profile molded design used on the ProTech Harness series. Tie-in points include the rear waist D-Ring for fall restraint and the front waist D-Ring that provides the wearer with the famous CMC level of comfort for rappels. *UL Classified to NFPA 1983. Ship wt. 3 lbs.*

Specify size: Small, Regular or X-Large

AJ338 Padded Rescue Harness \$165.95

CMC Rescue Utility Harness

A simple, one-size-fits-all harness that is an excellent choice for a truck company's rope fit. The Utility Harness uses the same heavy-duty web and buckles as our rescue harnesses and is sewn to the same exacting standards. Front Mil-Spec D-Ring is proof-rated at 5,000 lbs. Features contrasting stitching for easy inspection. *UL Classified to NFPA 1983. Color: black. Ship wt. 2 lbs.*

AJ337 Rescue Utility Harness \$106.95

CMC ProSeries Harness Combo

The ProSeries Harness Combo combines the ProSeries Rescue Harness and ProSeries Chest Harness to make a Class 3, full body harness. The chest harness can be removed allowing the sit harness to be used by itself. If your primary need is a Class 3 harness, but you want the flexibility of also having a sit harness, the combo is a great deal. *UL Classified to NFPA 1983. Ship wt. 8 lbs.*

- ▶ Rear attachment point Front chest D-ring transfers load to the sit harness, increasing comfort in a vertical lift
- ▶ Chest harness attaches to front and back D-rings on sit harness
- ▶ Built-in lumbar support
- ▶ Web-Keepers™ secure loose ends of the web coming out of the buckles
- ▶ Molded padding with breathable D3 cloth provides a better fit with greater comfort and lighter weight
- ▶ Larger front D-ring easily accepts three rescue carabiners
- ▶ 1 3/4" web adjusting strap wraps completely around for stronger harness
- ▶ Quick-fit buckles on the legs make donning the harness easy and quick

Size	Waist
Small	26" - 30"
Regular	30" - 44"
X-Large	42" - 46"

Specify size: Small, Regular, X-Large

AZ587 Harness Combo (Chest and Rescue Harness) \$344.95

CMC ProTech Fire-Rescue Harness

One of the most popular harness designs, the ProTech Fire-Rescue is in use by fire department rescue teams, USAR teams, helicopter crews, and wilderness SAR teams. The unique design of the dorsal D-Ring allows adjustment for different size rescuers, but stays in place when loaded, greatly increasing comfort. Gear loops have been added for storing equipment, but their design allows easy removal when using the harness for confined space entries. The front waist D-Ring allows a comfortable, stable sitting position for rappels and the sternum D-Ring works well for helicopter hoists. Quick-connect shoulder straps and leg loops make donning the harness simple and fast. Molded pads on the leg loops can be adjusted to the most comfortable position. The name and red color recognizes our customers selection of this harness as a versatile, multiple use harness for fire-rescue. Front strap accepts screw-links for adding a chest ascender or safety lanyards. *Attachment points: front waist, sternum, dorsal. UL Classified to NFPA 1983 and ANSI Z359.1 and CSA Z259.10. Ship wt. 4 lbs.*

Size	Waist
