

# Custom Fabricated Carts

Bayhead has a long history with fabricated carts, stretching back to the early part of the last century when we were a division of Spaulding Fibre. Carts back then were fabricated in steel and fibre material. We still custom-fabricate all-welded steel carts, and also work with plastic, aluminum and other materials including the fibre that started it all nearly a century ago! Please call for additional information or to discuss your custom cart requirements.

Fabricated steel cart made for GE operations

Fabricated plastic carts made for Pratt & Whitney parts handling

## Steel Cradle Trucks - “V”-Trucks

Long load being lowered onto two HDV carts.

Loaded HDV carts in transit.

“V”-Trucks are useful for moving long or bulky items within a facility. With weight capacities up to 4000 pounds, they are perfect for manually transporting bundles of steel or other extremely heavy items. Trucks can be paired off for long items and to provide even greater weight capacities. All-welded steel construction ensures a long life under severe conditions.

Model Number	Weight Capacity	Dimensions LxWxH	Caster Type	Ship Weight
LDX*	800 lb.	23.5”x 23”x 31”	4” rubber	48 lb.
MDV*	2200 lb.	24.5”x 22”x 31”	4” steel	68 lb.
HDV	4000 lb.	33”x 27”x 33.5”	5” steel	113 lb.
