

VSX Electric Blowers

Tempest Technology again demonstrates its leadership in the Positive Pressure Ventilation (PPV) Power Blower market! Tempest engineers have created the most powerful electric blowers ever manufactured and offered specifically to meet the needs of today's fire service. The VSX produces the highest rated CFM rates than any other variable speed electric blower, with CFM rates comparable to most gasoline powered blowers.

How to Choose the Correct VSX:

- ▶ 1) Verify supply circuit is not GFCI restricted
 - ▶ 2) Verify power source is 3.5kW, 120V, 60Hz, 20Amps or greater
 - ▶ 3) Pre-determine cord reel wire gauge, length
 - ▶ 4) Select option A, B, C or D based on available power cord length and gauge
- *These units are not compatible with GFCI restricted circuits
- Option B units will have 5% lower CFM rates
 - Option C units will have 8% lower CFM rates
 - Option D units will have 15% lower CFM rates

- ▶ Highest Rated CFM of any variable speed blower
- ▶ Intelligent Drive Technology
- ▶ Electronic Programmable Module (EPM)
- ▶ Exclusive AirFlex Impeller specifically designed for each VSX blower
- ▶ "Smart Drive" technology allows for gradual speed increase, eliminating start up amp surge
- ▶ 2 hp motor starts and runs continuously on standard 120 volt/20 amp non GFCI restricted circuit breakers

Cat#	Power Cord Needed*	Diameter	CFM	RPM	Width	Depth	Height	Weight	Price
BG276A	15' 12awg	16"	11,551	3,271	19.5	20.50	20.75	86	\$2,100.95
BG276B	200' 10awg								
BG276C	200' 12awg								
BG276D	200' 14awg								
BG277A	15' 12awg	18"	12,839	2,955	23.25	20.50	23.75	91	\$2,380.95
BG277B	200' 10awg								
BG277C	200' 12awg								
BG277D	200' 14awg								
BG278A	15' 12awg	21"	14,836	2,232	25.5	21	26	97	\$2,473.95
BG278B	200' 10awg								
BG278C	200' 12awg								
BG278D	200' 14awg								
BG279A	15' 12awg	24"	15,663	2,161	28.5	22	30	102	\$2,566.95
BG279B	200' 10awg								
BG279C	200' 12awg								
BG279D	200' 14awg								

* Blower is not supplied with 200' of cord. The 200' of 10, 12, or 14 gauge wire is "200' or less". Power cord used does not have to be exactly 200'.

Electric Blowers

The most comprehensive line of Electric Powered Blowers for PPV and NPV available today. Built on the same chassis that has been so successful for our Tempest Gasoline Powered Blowers, our Electric Powered Blowers are powerful, durable and versatile while maintaining the ability to operate on a standard household current.

- ▶ No exhaust emissions, which can collect Carbon Monoxide inside the structure that you are trying to ventilate
- ▶ Never requires "oil change" or has gas go bad while sitting in storage
- ▶ Designed to start and run off a standard residential 120v 20amp receptacle without tripping the circuit breaker
- ▶ Power supply is readily available at most work sites

BD184 Blower Light Kit - Consists of a switched, 150W halogen light that fits on all late model Tempest electric blowers manufactured with flip-up handles. The kit is factory installed as an option on new electric blowers with flip-up handles.

BD184 Blower Light Kit \$224.95

Cat#	Diameter	HP	CFM	RPM	Width	Depth	Height	Lbs.	Price
AS106	16"	1.5 TEFC	11,804	3,450	18.5"	20"	20.5"	66 lbs.	\$1,517.95
