

HIGH PERFORMANCE

SUPEREIGHT® HEAVY-DUTY FIBERGLASS SERIES

MODEL P2RW

Meets ANSI-Z89.1
Type I Class G or C

SUPEREIGHT® ROUGHNECK fiberglass protective caps set the standard for exceptional impact resistance, durability and crack resistance, all in the lightest weight fiberglass cap available. Comes with SUPEREIGHT's unique Impact Energy Control System and extraordinary comfort features for shift long wearing comfort under tough working conditions.

SUPEREIGHT® fiberglass caps also come in an additional formulation for use when extreme hazards and working conditions require an extra margin of performance.

Caps designated P2H provide additional heat resistance. Comes with the same protective performance and comfort package as Roughneck series caps.

MODEL S2F

SUPEREIGHT® SUSPENSION & IMPACT ENERGY CONTROL SYSTEMS

SUPEREIGHT® suspensions eight load bearing points balance and stabilize the caps weight and spreads it over the widest possible area for maximum comfort. When impacted, the suspension becomes an Impact Energy Control System that reduces force by breaking it down into smaller increments for each load bearing point to handle while spreading it over as large an area as possible. SUPEREIGHT's smooth crown shells and eight-point Impact Energy Control System interact with precision unattainable in ordinary caps to provide exceptional performance.

CHOICE OF THREE SUSPENSION HEADBANDS

Select the industry's only 360° padded sweatband (model W2F); the first and still the best strip-proof, crack-proof ratchet headband (model 3RW2); or patented Swingstrap that combines the benefits of both with the added ability to convert from the front wearing position to the rear wearing position (and back) without having to reverse the suspension or headband (3SW2).

CHOICE OF REPLACEMENT SWEATBANDS

Unlike ordinary caps, SUPEREIGHT® sweatbands can be easily removed and cleaned, or replaced. Your choice of soft cotton jersey (FM69); terry cloth (FM44RT) or 360° vinyl wrapped foam sweatband (S2F).
