

THERMO PLASTIC Welding Helmets

TIGERHOOD®

Ultralite

MODEL 111

Economical, stationary molded-in glassholder. Includes Flash Barrier.

CONTEMPORARY DESIGN

The sleek design that many welders prefer with Fibre-Metal performance enhancers added. Compact but roomy enough to fit over protective spectacles and respirators.

INNOVATIVE HEADGEAR

Contains an ergonomically correct headgear that locks in the "up" position with an "easy nod" feature that glides the helmet down to reduce repetitive motion strain on neck muscles.

HIGH PERFORMANCE

Molded from NORYL, its high strength-to-weight ratio allows it to provide exceptional performance and durability at the lowest possible weight for all day wearer comfort and productivity.

EXCEPTIONAL VALUE

Available in black, gray, blue, green and red molded-in colors plus gold and silver coating. Can be imprinted.

**JUST THE RIGHT BLEND
OF TRADITION AND
INNOVATION**

MODEL 190 GOLDEN TIGER

MODEL 190

Economical, stationary molded-in glassholder. Includes Flash Barrier.

HIGH PERFORMANCE PROTECTION SYSTEM

Model 190 GOLDEN TIGER'S vertical glassholder provides a full 24 square inches of unobstructed viewing area. The helmet is GOLD coated to deflect heat and lower the temperature inside the helmet while extending the service life. This results in a higher return on your investment.

All models shipped with standard shade 10 Polycarbonate filter plate installed.
