

# Maxiforce Air Lifting Bags

Maximum Force Where You Need It Most!

The Maxiforce Air Lifting bag is a thin, strong, molded envelope. It is made from a neoprene-covered Aramid reinforcement and has the power to lift, move or shift weights up to 70 tons. Of course there is more to a lifting bag system than the bag itself. The control equipment and components play a critical role in successful lifting bag use. Unlike other lifting bag systems, Paratech manufactures all of its major control components. This assures the quality of the lifting bag system from inflation to deflation.

- ▶ Made of the highest quality neoprene and embedded with 3 layers of Aramid fiber reinforcement on each side
- ▶ Each bag has been subjected to a stringent factory pressure test
- ▶ Available in square and rectangular shapes. Match the shape of the bag to the contact area of the load to maximize your effectiveness
- ▶ The thinner the bag, the better! Maxiforce Air Lifting bags range in thickness from 5/8" to 1"
- ▶ Small, molded, raised dimples provide an interlocking surface for stacking 2 lifting bags (no more than 2 bags may be stacked)
- ▶ Air inlet is threaded to receive a brass nipple. No corrosion and easy-to-repair!
- ▶ Inflation may be obtained from any air source (SCBA, compressor, truck air brake system, foot pump, etc.)
- ▶ Technical data molded into the bag and the famous "X" marks the center of the load
- ▶ Operating pressure 118 psi

## Air Cushion Lift Kits

Paratech's Rescue Air Cushions are designed as an advanced rescue tool. They are an ideal tool for high lift requirements of non-reinforced, broad surface found on trucks, vans, and light aircraft. Especially effective in the rescue or recovery of downed animals. The cushions are also used by collapse rescue teams to fill collapse voids and regain support for rescue struts, wall braces, and shoring.

- ▶ Storage and carrying case
- ▶ Repair kit
- ▶ 2 - Rescue Air Cushions with pressure reliefs
- ▶ Dual safety controller with quick connect coupling
- ▶ 1 - 16' of 3/8" diameter high pressure hose with quick connect coupling
- ▶ 2 - 20' of 1" diameter low pressure hose with quick connect coupling
