Darley Fire Hydrant Hand Pump

Pump Your Hydrants Dry, Frozen Hydrants Are Serious Hazards

The hydrant pump will pump a hydrant empty in a few strokes. Made with quality materials to last for years. The cylinder is seamless drawn brass. The plunger rod is steel and 3/8" diameter, the cylinder is 1 1/2" diameter. Top and bottom castings are extra-heavy solid brass castings. The pumping handle is solid hardwood. Can't rust, always ready-to-use. Only one hose is needed to drop down the body of the fire hydrant. Hose is 8 feet long with coupling included. *Ship. wt. 9 lbs.*

Hydrafinder

The 6" wide, reflective red striping tape on the white fiberglass shaft affords instant day and night visual location of the fire hydrant. The 3/8" diameter fiberglass shaft is attached to a heavy-duty MIL SPEC chrome-plated carbon-spring mount that allows for 360° flexibility. The Hydrafinder is adaptable to most standard fire hydrants with an easy-to-install 5/8" diameter bolt-on steel mounting bracket. *Ship. wt. 3 lbs.*
