

Prospan Professional Series Pneumatic Shoring

Prospan is a lightweight, expandable aluminum crossbrace designed to support trench walls, motor vehicles involved in roadway incidents, as well as reinforce the weakened members of failing structures. Prospan's unique design makes it the safest, most user-friendly pneumatic shore on the market. The final design of the Prospan product was a direct result of the input received from Firefighters and municipal public works employees from across the nation. Prospan is available in four sizes with spans of up to 11 feet. *Kit pricing available. Complies with OSHA standard governing excavation requirements.*

Kits available

AW258	Prospan Pneumatic Shore 21.5"-26.5" Span	\$377.95
AW259	Prospan Pneumatic Shore 29.5"-41"	\$429.95

AW266	Air Supply Assembly with H.P. Regulator	\$702.95

Telescoping Aluminum Support System

Prospan Manufacturing's vehicle stabilization product is called TASS. TASS is a 3-tiered, telescoping aluminum support system. Designed primarily for the stabilization of motor vehicles involved in roadway crashes, the TASS can be used for light structural support applications as well. The TASS is made almost entirely of anodized aluminum and stainless steel. Like all of the Prospan products, it has been designed to be incredibly strong, simple-to-use and virtually maintenance-free.

- ▶ Telescoping aluminum supports 26"-48" span
- ▶ Baseplate - 10" w/detent pins
- ▶ Baseplate shoring adapters
- ▶ Vehicle adapters
- ▶ V-Grip attachments
- ▶ Conical-shaped attachments
- ▶ Ratchet straps - 20" w/hook cluster

6' Deployable Raker System

Paratech offers the necessary accessories to convert our Long Shores into a fully deployable Raker Shore System that is fast, strong, easy-to-install, and the same raker kit FEMA teams use. Paratech's innovative Raker accessories and Long Shores meet US&R requirements for strength and deployability. The Paratech Long Shore System offers unique features and benefits ensuring proven performance every time the system is deployed. More kits can be installed if more coverage is needed. The main advantages of this kit are strength, ease, speed, durability and the ability to grow into a complete system. The struts included in this system are the strongest available and made from hard anodized aluminum for durability. Set up is fast and easy-to-learn. One kit will support an area of the wall approximately 12' high by 8' wide providing a safe entrance to the building. *Ship. wt. 441 lbs.*

- ▶ 4 - Model 610 rescue strut
- ▶ 2 - 235 extension
- ▶ 2 - 435 extension
- ▶ 2 - 635 extension
- ▶ 4 - 6' raker rail
- ▶ 2 - 12" hinged base plate
- ▶ 4 - Raker rail latch base
- ▶ 2 - Raker junction base
- ▶ 2 - Raker rail splice
- ▶ 2 - Raker angle base
- ▶ 6 - Nailing pad with clamp
- ▶ 4 - Shoring hammers
