

# COMBINATION Head, Face & Eye Protection

Most of Fibre-Metal's welding helmets, faceshields, protective masks and welding goggles can be combined with protective headwear by utilizing any one of our three combination systems to provide the exact degree of protection and comfort required.

**5000 ADJUSTABLE SPEEDY® MOUNTING LOOP SYSTEM** for frequent on/off use with protective caps. Welding helmets, faceshields, goggles, etc. may be mounted while the cap is on the head. No tools or modified caps required. (Does not affect ANSI rating.)

**4000 QUICK-LOK® SYSTEM** for secure, long-term combination use. (4002) QUICK-LOK® mounting blocks are screwed onto the protective cap. Welding helmets, faceshields, goggles, etc. are equipped with (4001) QUICK-LOK® cups which can be securely mounted onto and removed from the cap - without tools.

**6000 SLOTTED BLADE SYSTEM** for use with most popular brands of slotted caps. Fibre-Metal protective wear that is equipped with our (4001) QUICK-LOK® mounting cups, can be mounted on slotted caps by simply adding our 6000 Slotted Cap Blades.

## CAP PEAK MOUNTED FACESHIELDS

**FM70** fully dielectric-mounting bracket provides a positive seal to keep debris from filtering between cap and shield. The shield may be pivoted above the cap between uses without removing the cap. Designed to fit on the front peak of our E2 and P2 caps.

**FM71** mounting bracket offers the same features as the FM70, but is designed for our full brim protective hats (E1 series).

**FH66** aluminum mounting bracket offers the same design and features as the FM70, but manufactured from extruded aluminum. Lightweight dual-channel bracket is designed to fit on the front peak of our E2 and P2 caps.

## HIGH PERFORMANCE PROTECTIVE MASK

Radiant or blasts of heat are reduced without loss of ventilation or vision by stainless steel screen. Screen mounts to a lightweight fiberglass shell at eight points. Also available with .060 acetate window (622CL).
