SPIRIT OF AMERICA

Full graphic design protective hats and caps raise head protection aesthetics to a new level. The full graphic process, developed and perfected by Fibre-Metal, produces complex, colorful designs that won't chip, fade nor peel.

The unique Fibre-Metal full graphic process applied to top quality, high performance Fibre-Metal SUPEREIGHT® hats and caps results in a head protection product unavailable anywhere else at any price.

Our spectacular Spirit of America full graphic allows workers and employers to express their support for their country. Our Pride of Mexico design provides the same privilege for those who wish to express their affiliation with Mexico. A number of new exciting designs are in the works.

In addition to using Fibre-Metal full graphic head protection on the job, many companies use them as Safety Awards; as special caps for ground breaking or other special events, etc.

Special edition designs can be produced to your specifications or design.
