

DURA-SHELF™ SHELVING & STORAGE

When you're ready to step up to the toughest, largest plastic shelving in the industry, it's time to go with Dura-Shelf™ all-plastic industrial-grade shelving systems.

Our unique locking collar system lets you choose whether to build up, out or both. Our rigid high-density polyethylene panels are like nothing else you've ever seen in plastic shelving. Each panel is a stout 2-5/8" thick with a grid top that allows liquids to flow through, promotes air circulation and prevents dust build up. The entire system is chemically resistant, making it an ideal choice for HAZMAT storage or any other application, corrosive or not.

24-INCH CONTAINMENT TRAYS

Containment trays keep materials separated and confine spills to prevent damage to items stored on lower shelves or in adjacent compartments of the same shelf. Use one tray between each section of leg posts. Available in OSHA-approved chemical storage color coding. Available for 24-inch wide shelving only.

DURA-SHELF™ ADJUSTABLE

Adjustable panels let you fit what you want where you want it. Slide the panels up and down the legs in four-inch increments to create a custom space that will accommodate virtually any storage need. Choose our original ventilated grid-top design, or try the solid-top version of Adjustable Dura-Shelf™, ideal for higher capacity needs and preventing cross-product contamination from shelf to shelf. Adjustable Dura-Shelf™ will redefine the way you think of plastic shelving.
