

## NORTHFLEX LIGHT TASK PLUS 3™ PU PALM COATED DYNEEMA® GLOVE

NFD16G

Medium-weight cut resistant glove that offers a great compromise between mechanical protection and wearer comfort.

### FEATURES AND BENEFITS

- Seamless Dyneema® liner is up to 15 times stronger than steel (weight for weight) and outperforms aramid fibers in cut and abrasion resistance.
- ANSI cut level 2 and EN388 cut level 3 performance.
- North's Dyneema® shell is stretchy and form fitting, allowing superior dexterity.
- The PU coating provides exceptional abrasion resistance, but is light enough to ensure workers retain outstanding dexterity and tactility.
- Gray color hides dirt, making it a good choice for many tough and dirty applications.
- The back of the glove is un-coated, for ventilation and comfort.
- Contains no reaction causing, natural rubber proteins.
- Cuff over-stitching is color-coded by size to aid sorting after laundering.
- Complies with USDA and FDA regulations, 21 CFR, for use in food processing.

### APPLICATIONS:

- Ideally suited to material handling and assembly work involving sharp objects like sheet metal, metal shavings, glass and metal parts.
- Sheet metal fabrication, machine shops, glass industry, automotive and other assembly work.

PART NO.	DESCRIPTION	SIZES	INNER PACK	CASE PACK
NFD16G	Gray Dyneema® shell, coated with gray PU	7S, 8M, 9L, 10XL, 11XXL	12 Pairs	72 Pairs

## NORTHFLEX LIGHT TASK PLUS 5™ BI-POLYMER PALM COATED DYNEEMA® GLOVE

NFD20B

High performance cut resistant glove that gives up nothing in wearer comfort.

### FEATURES AND BENEFITS

- Highly advanced seamless liner contains "stretch-broken" Dyneema® yarn that is cool, stretchy and amazingly light.
- 13 gauge liner also contains glass fiber for enhanced cut resistance.
- ANSI cut level 3 and EN388 cut level 5 performance.
- Liner is stretchy and form fitting, allowing superior dexterity.
- Bi-polymer coating is a blend that combines the best properties of nitrile and PU (polyurethane) to provide a surface that is mechanically tough, grippy and flexible.
- Black and dark blue colors hide grime making this glove a highly practical choice for the dirtiest of jobs.
- Fully launderable for extended use.
- The back of the glove is uncoated, for ventilation and comfort.
- Cuff over-stitching is color-coded by size to aid sorting after laundering.

### APPLICATIONS:

- Suited to applications requiring a moderate to high level of protection from cut hazards combined with a high degree of dexterity and feel, such as material handling and assembly work involving sharp objects like sheet metal, metal shavings, glass and metal parts, for example; sheet metal fabrication, machine shops, glass industry, automotive and other assembly work.

PART NO.	DESCRIPTION	SIZES	INNER PACK	CASE PACK
NFD20B	Dark Blue Dyneema® liner with black bi-polymer coating	7S, 8M, 9L, 10XL, 11XXL	12 Pairs	72 Pairs

**CAUTION:** Cut resistance data in this catalog is given in good faith and is intended to provide users with a means of comparing and selecting gloves. It does not provide a definitive statement on the likely performance of gloves in actual applications. It is the responsibility of the end user to select appropriate personal protective equipment (including hand protection) and to exercise caution and common sense when exposing workers to potential hazards in the work place. Cut resistance testing of gloves is carried out under laboratory conditions, but minor variations between individual gloves and test blades means that a scatter of results is generally obtained. The average of these results is accepted to represent the performance level of the glove, but it is only an average. Results obtained for individual gloves of the same type can be lower or higher than the average.

**WARNING:** Cut resistant gloves are designed to offer protection from potential cut hazards, but they are not cut-proof. Each glove has performance limits. Do not expose to moving blades or machinery.
