

Roof Hook

Akron Brass is proud to introduce the Akron Roof Hook. Like all Akron Brass pike poles, the Akron Roof Hook is designed to perform reliably through the toughest use and abuse seen in today's firefighting industry. It is designed with the highest grade materials for a long lasting, durable, and maintenance-free tool. This all around tool can be used for forced entry, prying open roof scuttles and sky lights, sounding floors, roofs and much more. *5-year warranty.*

NEW

- ▶ Multipurpose head and chisel foot (**BG537** has Ram Knob foot for gas shutoff)
- ▶ Hollow steel shaft
- ▶ Industrial quality abrasive grips
- ▶ Powder-coated finish for unparalleled corrosion resistance

BG537	17" Roof Hook	\$46.95
BG538	24" Roof Hook	\$58.95
BG539	36" Roof Hook	\$67.95
BG540	48" Roof Hook	\$76.95
BG541	72" Roof Hook	\$93.95
BG542	96" Roof Hook	\$99.95

4AA Helmet Lighting Kit

The firefighter's helmet flashlight clamp used in conjunction with a Streamlight 4AA flashlight offers hands-free lighting. The clamp can be attached to the brim of both traditional (up-brim) and modern (down-brim) firefighter's helmets and allows for adjustability. The components of the flashlight clamp are made of stainless steel to give corrosion resistance, sufficient strength and rigidity to the assembly.

NEW

\$47.95

- ▶ ProPolymer® 4AA Lux Div 2 LED flashlight
- ▶ Stainless steel helmet clamp
- ▶ Rubber helmet strap
- ▶ Adjustable wrist lanyard
- ▶ Powered by 4 "AA" alkaline batteries
- ▶ Super high-flux LED provides up to 3,500 peak cp (42 lumens)
- ▶ Waterproof; non-conductive; corrosion-proof
- ▶ Deep Parabolic Beam Generator produces long range brilliance & smooth, uniform pattern
- ▶ Solid State Power Regulation provides max light output throughout battery life
- ▶ Runs up to 4 hrs. at full intensity with 2 additional hrs. of declining, usable light
- ▶ 7" long
- ▶ Ship. wt. 1 lb.

BG534	4AA Helmet Lighting Kit	\$47.95

Safer Search System

This system aids in conducting team searches when conditions such as building construction, layout, and/or inherent hazards are beyond the scope of the ordinary search techniques. It includes a search rope with direction and distance markers every 25', a stuff bag, and a Safer Search Device (SSD) that slides along the rope and automatically locks in place. The SSD has attachment loops for tag lines, to provide connection points for multiple rope operations, or to secure a tie-off point.

NEW

- ▶ Lock/direction markers and distance markers help firefighters know their position along the search rope
- ▶ Markers are designed to allow for quick and easy rope deployment from the bag
- ▶ All are anodized, machined 6061-T6 aluminum
- ▶ Shapes are easy to feel with a gloved hand
- ▶ Markers are locked in place with a stainless steel set screw

Cat#	Description	200'	300'	400'
BG543	Safer Search System w/Rope, 2 Taglines (15' ea.), and Bag	\$913.95	\$1,208.95	\$1,539.95
BG544	Safer Search System w/Rope, 2 Retractable Taglines (9' 8" ea.), and Bag	\$1,013.95	\$1,308.95	\$1,639.95
