HazChem Hazard Classification Kit

The kit designed to provide first responders a rapid and easy method to determine if unknown or suspicious material present a possible chemical, radiological or biological hazard to the responder, population or surrounding environment. The procedure is not designed to identify the substance, but to determine if a possible hazard may exist. Kit may be used by personnel with basic hazmat training skills in any situation where hazardous material may be of concern.

- ▶ Abandoned containers or drums
- ▶ Illegal drug operations
- ▶ Chemical inventories
- ▶ Household chemical cleanups
- ▶ Unknown powders
- ▶ Confirm labeling
- ▶ Roadside dump site
- ▶ Determine bulking compatibility
- ▶ Check decon and PPE compatibility
- ▶ Suspicious materials

BH024	HazChem Basic Hazard Classification Kit	\$1,499.95
