

Continental Washer Extractors

The Key to Decontaminating Gear

Dirty turnout gear not only exposes firefighters to biohazards and carcinogens, it ignites and conducts electricity more easily than clean gear. That's why proper decontamination of protective clothing is mandated by the NFPA. By properly cleaning turnout gear, firehouses can extend gear life, improve firefighter health and safety, and prevent the accidental contamination of the general public. Continental on-premise washer-extractors offer highly programmable controls that allow firehouses to properly wash a variety of items, including gear liners and shells, ambulance bedding, EMS jumpsuits and shop towels according to manufacturers' guidelines. Programs are set using different variations of water temperature and levels, baths, rotation, chemicals and extract. Operators simply enter a program number and press start. Cleaning chemicals are automatically injected at the right water level, temperatures and cycles to eliminate user error, waste and damage to gear. The PM Control offers maximum flexibility with 20 pre-programmed and 79 user-programmable selection options. Not only is Continental laundry equipment perfectly suited for the fire industry, fire departments often get funding to purchase Continental washers via the Assistance to Firefighter Grant Program (AFGP), which offers millions of dollars to fire departments nationally to improve firefighter safety. *Ship. wt. 889 lbs.*

Cat#	Description	1-Phase 30#	1-Phase 50#	3-Phase 30#	3-Phase 50#
BD125	(PM) Washer-Extractor	\$7,495.95	\$10,198.95	\$7,114.95	\$9,549.95

DRYGEAR Drying Systems

Dries coats, bunker pants, boots, helmets and gloves quickly. Better than a tumble drier for use on your expensive bunker gear. Dries gear from the inside out by forcing gentle warm air through hollow hangers. Available in three to eight stations. *Ship wt. 376-464 lbs.*

Features:

- ▶ NFPA Compliance 1851
- ▶ No mechanical action to damage gear
- ▶ Runs with or without heat
- ▶ Built-in overheat protection
- ▶ More power and increased air for faster drying
- ▶ Fully dry washed gear in 4-5 hrs.
- ▶ Easy access transparent roll-up flap
- ▶ Wheeled casters option for easy movement

DryGear PLUS Features:

- ▶ Removable hanger assemblies allow the DryGear PLUS to dry fire hose and other loose equipment
- ▶ Loosely coiled hose or equipment is placed on the rack
- ▶ Roll the rack into the DryGear PLUS and close the roll-up flap
- ▶ Select air and heat or air only and set the timer
