Low Pressure Nozzles

There are two ways to reduce reaction force on any handline nozzle: flow less water or lower the nozzle pressure. By reducing the flow, your firefighting capabilities are also diminished (water still extinguishes the fire) however, by reducing the nozzle pressure to apply that flow, you merely lessen the reaction force of the fire stream and that equates to less "wear-n-tear" on the nozzle team.

- ▶ Durable, lightweight Elk-O-Lite® construction
- ▶ Combination fog and straight stream
- ▶ Constant/single gallonage
- ▶ Flow efficient - fully machined waterway
- ▶ Rugged aluminum/bronze shutoff handle with double stops
- ▶ Heavy-duty, protective urethane bumper
- ▶ Flush feature
- ▶ Adjustable neoprene seat with acetal ball
- ▶ Replaceable, spinning teeth for wide, protective fog
- ▶ Hydraulically balanced ball shutoff
- ▶ Gallonage stamped on stem head

AZ349	1½" NST Chief Nozzle	\$623.95
AZ350	1½" NST Chief Nozzle w/Pistol Grip	\$668.95
AZ351	2½" NST Chief Nozzle	\$718.95
AZ352	1¾" Break-A-Part Nozzle	\$1,114.95
AZ353	2½" High Rise Nozzle (15/16 Tip)	\$1,049.95

NEW

Flex Attack® Nozzle

Go from CAF to H₂O with a Click of the Tip

The Flex Attack® CAF nozzle quickly switches between wet foam, dry foam and water only without shutting down. Now there's no need to compromise when fire fighting. Click left for a huge, unobstructed waterway to produce shaving cream dry foam. Click right for a hard hitting 15/16" smooth bore. The Flex Attack® is durable, dependable, best of all, simple to use.

- ▶ Free swivel inlet
- ▶ Hard anodized, Teflon® impregnated aluminum alloy body and pistol grip
- ▶ Aluminum bronze shut-off handle
- ▶ Zytel® ST801 polyamide center barrel
- ▶ 70A urethane compressible bore
- ▶ Max operating pressure of 200 psi
- ▶ Ultra-high molecular weight, polyethylene shut-off seats

Cat#	Description	Performance	Price
BG512	Flex Attack® Nozzle	184 gpm @ 50 psi in Water Setting	\$759.95

Gallonage stamped on stem head

Chief Constant Flow Nozzles with Glow Bumper

- ▶ Elk-O-Lite® construction
- ▶ Rugged, lightweight
- ▶ Heavy-duty, protective urethane glow bumper
- ▶ Durable aluminum/bronze shutoff handle
- ▶ Flow-efficient, constant gallonage operation
- ▶ Adjustable Teflon/Neoprene valve seat
- ▶ Superior straight stream for effective penetration
- ▶ Excellent for AFFF or Class A foam application
- ▶ Comfortable, no-slip pistol grip
- ▶ Spinning teeth for wide protective fog
- ▶ Meets NFPA 1964
