Foot-operated hydraulic post lift tables are built for heavy-duty shop use such as lifting dies and castings, moving machine parts, positioning welders' work, leveling feed material for pump presses, conveyors and press brakes, and similar material handling jobs. Posts are telescoping to help stabilize and support loads during operation. Light-duty units feature a single-speed foot pump. Heavy-duty units feature a two-speed foot pump for maximum operator convenience. All foot pumps include a down speed control valve for safe platform lowering.

DC units include a 12V DC electric motor to raise and lower the platform. They also include a battery, on-board charger, and a hand control on an 8 ft. coil cord.

Units include four casters; two swivel with total-locking brakes and two rigid.

Model HT-02-1616A includes a platform that swivels 360° for use as a turntable. Model HT-02-1616A and HT-05-1818A come with a removable rubber platform cover.

Mechanical Post Tables

Adjustable height portable tables are well suited for a wide variety of material handling applications. Moves smoothly on two rigid and two swivel 5" x 2" polyurethane casters. All welded steel construction (1/4" deck) and blue powder coat top. Provide positive height adjustment without downward drift. Features a two-speed manual gear mechanism to move heavy loads at 1/8" per crank rotation or lighter loads at 5/16" per crank rotation. DC powered unit includes an on-board charger.
