Wheel Chair Ramps

The Americans with Disabilities Act requires that all buildings must be accessible to disabled persons. Failure to comply may result in monetary damages and civil penalties. According to ADA rules and regulations, for every inch of rise you must have a foot of ramp in length.

A) TELESCOPIC RAMP is constructed of lightweight aluminum extrusion. Top surface is serrated for positive traction.

B) FOLD-A-WAY RAMP has a convenient design which permits easy, one person storage and handling. Slip-resistant surface provides extra traction. Each ramp comes with 2 handles for easy positioning.

C) GRATE RAMP is a semi-permanent ramp that is ideal for high traffic areas. Handrails are available.

D) ROLL-O-RAMP provides access over curbs. Wheels installed on curb of ramp for portability. Beveled edges create smooth transition between ramp and ground.

New

TYPE	MODEL NUMBER	DIMENSIONS (WIDTH x LENGTH)	CAPACITY (POUNDS)	NET WT. (POUNDS)
A	D-TR-88	7-7/8" x 88"	550	65/pr.
