

# 3M™ RRPAS™ Rapid Response Powered Air Systems

When fast response to an emergency is required, you'll want equipment that is not only effective but easy to transport and to put on so that you can get to the job of helping people faster and more securely. That's exactly what our rapid response systems offer.

## 3M™ RRPAS™ 6000 Series

- Components are stored in a unique carrying bag that transforms into a vest with the PAPR in place and ready for use.
- Use with 3M™ Canister FR-40 and 3M™ Cartridge FR-57.
- Helps provide exceptional comfort and mobility.
- The vest/bag allows fast and easy donning.
- Easy to use fasteners allow fast adjustment to individual sizes.

A belt-mounted system is available for those who have their own vest or prefer to use without a vest.

3M™ Full Facepiece Respirator 6000DIN Series offers the flexibility for use in either negative or positive pressure applications. It can be used with 3M™ Cartridge CP3N for teargas agents and with 3M™ Cartridge FR-64 for military and industrial materials.
