

## Dock Loading Lights

Lights minimize freight damage while expediting loading and unloading operations. Designed to provide uniform visibility inside trailers or around dock areas. All Dock Loading Lights are UL listed.

**Incandescent Lights, series LL and LL-SAI,** offer good color, low replacement cost and turn on instantly even in cold environments. It utilizes a 90 watt bulb, model PAR-38, sold separately. Adjustable arm knuckle joint allows vertical and horizontal positioning.

**Halogen Incandescent Light, model HLGN-40,** typically provides more lumens/watt, better energy efficiency, has a longer service life and experiences less light depreciation over its lifetime. It is supplied with a 500 watt bulb. Full illumination is instantaneous.

**High Pressure Sodium Lights, series LLS and AALLS,** offer much higher lumens/watt output and a very long lamp life. Its illumination color rendition (yellowish) is not as desirable as an incandescent. They typically require several minutes to fully illuminate, and even longer if in a cold environment. Low operating cost.

**Spun Aluminum Dock Lights, series LL-SAI and LL-SAF,** stay cool to the touch even with a 300 watt incandescent light. Features strut arm with both horizontal and vertical adjustment. Available in a standard incandescent lamp head and a fluorescent lamp head. Fluorescent units include a bulb and head.
