

## Manual Drum Deheaders

model DD-9

model D-HEAD-1

Convert your closed head steel drums into storage containers with our Drum Deheaders. The *DD-9* can be adjusted to open steel drums with different thicknesses. The blade is angled for maximum penetration and flattens the cut edge so there are no sharp or jagged edges. Replacement blades available, model *DDB-1*.

Quickly remove the head of a steel drum in less than 30 seconds with our new Express-Open Drum Deheader! Unique design, model *D-HEAD-1*, is similar to a household can-opener and is very easy to use. Comfortable handle configuration allows for maximum operator comfort. Includes vice-grip style mechanism for securely attaching unit to drum. A standard 1/2" ratchet drive (manual or pneumatic) must be used to operate the deheader (ratchet drive not included). Inside cutting blade does not leave a sharp edge on the drum. Replacement blades available separately, model *D-HEAD-B*. Both styles open 30 and 55-gallon steel drums and 5-gallon pails.

MODEL NUMBER	DESCRIPTION	NET WT. (POUNDS)

<b>CAN-CAP-G</b>	OPEN HEAD (tight head)	24 1/2"	3 1/2

## Drum Covers

Protect your drums from bung seepage and unprotected outdoor storage situations. Convenient, and designed for years of reliable use. *Series DC-TP* is constructed of flexible 60 mil thick polyethylene. Features an ultraviolet screen. Temperature range is -50 to +212°F. *Series VDC*, simply set on top of the drum. The 2 1/2" side lip keeps rain water out. This durable cover will allow other drums to be stacked on top of it. Overall height is 3". Rigid Polyethylene construction. Specify color when ordering. Choose from blue, black, green, red, yellow, or white.
