# Don't install a 20th century zone controller on your customer's 21st century hydronic system.

ITT's McDonnell & Miller ZoneSmart is a ready-to-install controller for hydronic circulators in residential and light commercial applications. All ZoneSmart controllers are UL and cUL listed and feature multi-function LEDs that are visible without removing the cover for easy start-up and troubleshooting. All units are compatible with analog and digital 24 VAC thermostats, including "power stealing" designs.

# ZoneSmart includes standard features that are extra cost upgrades for other zone controllers...

- Priority circuitry enables domestic hot water zone to have priority over other zones. Built in protection limits priority operation to a user-selection duration.
- The purge timer enables every last BTU to be extracted from the boiler instead of letting energy and money go to waste.
- The exercise feature activates each zone for a few seconds during off-peak season to ensure a trouble free start-up when there is a call for heat.
- 4 and 6 zone controllers are easily connected via an RJ-11 cable to accommodate systems consisting of up to 18 zones.
- Available with integrated outdoor reset controls.
- Five-year warranty.

For more information on ZoneSmart and our complete line of hydronic and steam boiler controls, contact your ITT HVAC Representative or go to [www.mcdonnellmiller.com](http://www.mcdonnellmiller.com).
