3M™ Particulate
Filter 2091, P100

3M™ Particulate
Filter 2097, P100*,**
with Nuisance Level
Organic Vapor Relief

3M™ Particulate
Filter 7093, P100

* 3M recommended for ozone protection up to 10 x OSHA PEL.
This product is not NIOSH approved for ozone protection.

** Nuisance level refers to concentrations below the current OSHA PELs.

3M™ Qualitative Fit Test
Apparatus FT-10, Sweet

3M™ Qualitative Fit Test
Apparatus FT-30, Bitter

3M equipment and procedures help provide a simple, direct way to meet OSHA qualitative fit testing requirements. Our fit test products can be used with any particulate or gas/vapor respirator with a particulate prefilter to test face-to-respirator seal. The equipment helps satisfy respiratory program requirements and is easy to use during respiratory training.

3M fit tests work by spraying either a sweet or bitter solution into the hood environment. If the person being tested does not detect the test agent's taste, an acceptable fit has been demonstrated.
