

3M™ Air-Mate™ SCBAG™ Self-Contained Breathing Apparatus (SCBA) Is Uniquely Innovative

This SCBA is totally unique with all components stored in a carrying bag that converts into a vest with everything in place and ready to wear.

- Completely portable.
- Can be donned in seconds.
- The lightweight harness has shoulder and back padding for greater comfort.
- Continuous chest size adjustment up to 58" to fit most wearers.
- The vest/bag allows fast and easy donning.
- The vest distributes weight evenly for added comfort.
- Great for confined spaces and emergency use.
- Optional airline connection for extended time usage.
- Hoop-wrapped, 30-minute cylinder is positioned for ideal weight distribution and easy valve access.
- The full facepiece is based on 3M's innovative technologies.
- Lightweight and comfortable to wear.
- Features a quarter-turn pressure-demand valve with first-breath activation.
- Facepiece available in small, medium and large sizes.
