The Dry EcoSmart line ushers in a new era of the green movement. Now laundries can go green without compromising anything in their business model. Speed no longer has to be sacrificed for efficiency and green ideals don't have to be sacrificed for profitability.

## Features and Benefits

- Available in four of the **most-popular sizes**
- **25% more energy-efficient** than any other dryer on the market
- **Dries as fast** as competitive models
- **Dual-paned door** glass keeps heat in the basket
- Completely **sealed basket** won't let hot air escape
- **100% axial airflow** moves heat through the load
- **Non-perforated ribs** and basket eliminate the hazards of screws tearing garments or damaging the dryer
- **Auto-Dry residual moisture control** ensures garments are dried to specs without costly overdrying
- **Fully integrated steel pedestal** eliminates need to purchase separate pedestals
- **Stainless steel drum** perfect for professional wet cleaning applications (standard on ES-30, ES-30/30, ES-31/31, and optional on ES-50, ES-76)
- **Backwardly inclined blower** won't clog with lint
- **Self-diagnostic microprocessor** controls for ease of use
- **Lint tray is 300% larger** for less frequent emptying (single-pocket dryers)
- Available in **different colors** (white front and sides standard, blue and black-and-white colors optional)
- Available with **optional stainless steel cabinet**

Because saving energy makes cents
