

Edco MOD 12 Key Systems

The Edco MOD-12 combines AC and Tip/Ring protection for Key/PBX Systems into one attractive, compact assembly. This innovative design creates an automatic ground window, thus eliminating the problem of ground potential difference.

The Edco H-Series Protector Modules readily snap onto the Edco MOD-12. Protection is expandable from one to twelve pairs in single pair increments, and is field upgradable. In addition, test points are provided on each pair.

Features

- One to twelve pair
- Replaceable single pair protection modules
- Punch down (66 type)
- Test points
- Protective transparent cover
- UL 1449 listed
- 5 year warranty

AC Protection Options

1. Basic internal surge protection (standard)
2. Plug-in Hybrid surge protection, 2 outlets (TS-1200 optional)

Tip/Ring or Data Protection

1. Incoming C.O. lines use HCO
2. Analog extensions use HAE
3. Digital extensions use HDE
