

## MT109-100

### 8-In 1-Out Stereo Audio Switcher

**Common features:**

- 3.5mm inputs/terminal block outputs
- Balanced/single ended output
- Signal present LED (signal detect)
- Line level input/output
- Volume control
- 20Hz – 20KHz bandwidth
- Easy to control

*Uses 1 slot in MT enclosure*

## MT109-101

### 4-In 1-Out Stereo Audio Switcher

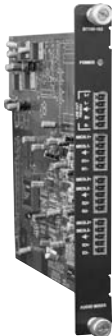

**Common features:**

- Terminal block connectors
- Balanced/single ended ports
- Signal present LED (signal detect)
- Line level input/output
- Easy to control
- Low impedance output
- Volume control
- 20Hz – 20KHz bandwidth

*Uses 1 slot in MT enclosure*

## MT109-102

### 3-In 1-Out Audio Line/Mic Mixer

**Common features:**

- Line or MIC level inputs
- Terminal block connectors
- Balanced/single ended ports
- Line level output
- Noise gate threshold
- Easy to adjust
- Low impedance output
- Input level control
- 20Hz – 20KHz bandwidth

*Uses 1 slot in MT enclosure*
