

AVPortal

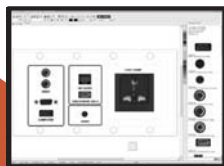

The ALTINEX AVPortal™ system is used for designing standard-sized and customized wall plates, rack plates, floor box plates and table mounted plates with various A/V connectivity options. AVPortal allows you to completely customize AV plates to fit your application and view/adjust the design before they are produced. Commonly-used connectors are provided to make the design process simple. AVPortal also includes a variety of 110V or 220V power options.

Simple steps to get your own AVPortal:

1 Concept

- Quick turnaround time
- Instant quotes for standard plates
- Standard or custom size/color
- “What-you-see-is-what-you-get” preview
- Free AVPortal design software
- Quantity from 25 to 2,500pcs
- All connectors on the back of plates allow direct cable extension

The AVPortal™+ provides a semi-standard solution for customizing your own AV wall plate and can be ready to ship for a quick turnaround. Available in several elegant colors, AVPortal+ bezels are easy to install, sturdy and do not require any tool to remove or replace if needed. The mounting plate has 10 slots available for any sectional plates you select. If you cannot find the proper pre-configured plate for your specific connections, use the empty snap-in plate and pick any snap-in connectors from the list at page 2.36.
