

RIGID VINYL MUD SET DRYWALL BEADS

MUD SET BEADS

Mud Locks cover entire flange.

TRIM-TEX MUD SET BEADS ARE DESIGNED TO BE INSTALLED WITH ALL PURPOSE DRYWALL COMPOUNDS.

Set Back the Drywall for Rigid Corner Bead or Bullnose as shown to the right.

Versus

Smooth exposed metal has minimal bond to mud. Only the short paper tabs hold the bead on the wall.

Why switch from Paper Faced Beads?

No denting - No blistering or paper fuzzing - No mold or rust issues – Mud Set Beads are the only product with patented Mud Locks and self leveling micro perforations.

How does pricing compare?

Trim-Tex Mud Set Beads are less than paper faced metal beads and significantly lower than flocked or paper covered composite beads. Trim-Tex's 100% Rigid Vinyl construction assures zero pre-installation or jobsite damage.

Does it use more drywall compound?

It depends which tape-on bead you're comparing to, and how they are installed. Tape-on beads can trap excess compound under the paper flange, raising the bead off the wall and using more compound on all coats. Mud Set Beads feature a combination of micro perforations and Mud Locks to provide the exact amount of compound needed; securely bonding the bead to the drywall. No excess. No waste.

Is it compatible with any current hopper?

Yes. But on the Strait-Flex hopper, use the bullnose inserts for both Bullnose and Rigid 90° Mud Set Beads.

What about rollers?

Most rollers are compatible, however, we recommend using Trim-Tex Pro Series Roller Tools (#385) because our simple one roller combo tool is designed to perfectly center and embed our beads with one up and down motion. Other company's tools will work, however, they are designed to embed paper flanges rather than plastic mud locks.

Is it guaranteed?

Trim-Tex guarantees the product will not edge crack or fail (with proper installation). Our guarantee is simple. If you are not 100% satisfied with the performance of Mud Set Beads, we will refund you 150% of your purchase price.

6 Mud Set Beads *New*

Mud Set Rigid Corner Bead

- I-Beam is 3 times more rigid than standard vinyl corner bead & creates a sharper corner
- Compatible with all hoppers and most roller tools
- Mud Lock technology assures no cracks or call backs, guaranteed
- Features wider mud legs than our standard corner bead; a full 1 3/8" wide

STOCK No.	LENGTH	Pcs. PER BOX
