

## conference facilities... accommodation...

## student accommodation... medical rooms...

Conference facilities and accommodation are often vital income generators and it is important that the floors make visitors and students feel welcome. Attractive warming colours and natural effects are a must for bedrooms whilst lecture theatres and other facilities may require compatibility with raised access floors to enable rapid access to vital services.

### Key selection criteria:

- Natural wood and stone effect floors to create warmth and prestige feel
  - Wide range of contemporary colours and designs
  - Noise reduction and comfort underfoot
  - Hygienic easy to clean surface
  - Compatibility with carpet and other materials
  - Compatibility with raised access floors
- Creation** – prestige decorative tiles available in a wide variety of realistic wood and mineral effects. Creation can be laid with coordinating borders for maximum impact. Creation is protected with a PUR surface treatment and offers superior performance to natural equivalents.
- Saga Fast track loose lay tiles** – specifically developed for use with raised access floors and alongside carpet tiles. Treated with Protecso<sup>®</sup> to eliminate the need for polish.
- Brazilia, Forum, Jamaica and Metallica** – high design, heavy duty multilayered sheet products protected with Protecso<sup>®</sup> to eliminate the need for polish. Available with very high density foam backings to offer noise attenuation to 17db.
- Taraylay Comfort Unis, Memphis and Papyrus** – offering high level heavy traffic performance and excellent sound insulation performance of 18db. Also protected with Protecso<sup>®</sup> - the no polish solution.

Creation Wood colour range

- Student bedrooms and communal areas will benefit from easy maintenance and hard wearing resilient floors. Flooring can be selected to increase the warmth of the area or to create a bright open contemporary feel. Resilient natural effects can be selected to provide a homely look whilst offering increased comfort underfoot and better resilience than natural equivalents.
- Safety should be a key consideration in student kitchens and bathrooms where water and other contaminants will inevitably present opportunities for slip accidents.
- Medical treatment rooms and overnight sanatorium care rooms need to offer patient reassurance to speed recovery and must be easy to maintain to ensure high levels of hygiene.
- Key selection criteria:**
- Natural wood and stone effect floors to create warm, homely feel
  - Hygienic easy to clean surface
  - Wide range of contemporary colours and designs
  - Noise reduction and comfort underfoot
  - Compatibility with carpet and other materials
  - Safety – it is essential to reduce the risk of slip accidents

### Gefflor recommended solutions:

**Creation** – prestige decorative tiles available in a wide variety of realistic wood and mineral effects. Creation can be laid with coordinating borders for maximum impact. Creation is protected with a PUR surface treatment and offers superior performance to natural equivalents.

**Nera Contract Wood & Pixel** – realistic wood and crystalline finished sheet – available in 4m widths and with minimal maintenance uv cured PUR surface treatment. Some wood versions available with comfort foam backing and noise attenuation to 18db.

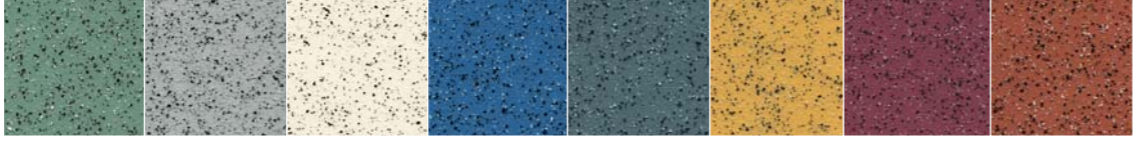

**Saga Fast track loose lay tiles** – specifically developed for use with raised access floors and alongside carpet tiles. Treated with Protecso<sup>®</sup> to eliminate the need for polish.

**Brazilia, Forum, Jamaica and Metallica** – high design, heavy duty multilayered sheet products protected with Protecso<sup>®</sup> to eliminate the need for polish. Available with very high density foam backings to offer noise attenuation to 17db.

**Taraylay Comfort Unis, Memphis and Papyrus** offering heavy traffic performance and excellent sound insulation performance of 18db. Also protected with Protecso<sup>®</sup> - the no polish solution.

**Tarasafe Standard** – budget solution for areas requiring reduction in the potential for slip accidents – also available in Comfort version to reduce noise and increase underfoot comfort and Super with added grip for areas of extreme contamination areas such as kitchens.

**Sparclean<sup>®</sup> treated Tarasafe** – Ultra & Style high design, low maintenance surface to minimise potential for slip accidents.
